

# Delta Drive™

*...another feature of ThinkWise™ Technology*

*Automatically Adjusts  
Incubator to Create  
Optimum Environment  
for Your Embryos!*

## Delta Drive™

Jamesway's latest innovation – Delta Drive™ – has partnered with Jamesway Pilot™ to do the monitoring for you.

- Delta Drive™ embedded software receives egg shell temperature data constantly from optional Pilot™ system.
- Delta Drive™ has the sophistication to then adjust fan speed on the optional variable speed fans automatically to provide the optimum incubation temperature and CO<sub>2</sub> levels.
- Delta Drive™ cuts your energy costs by running at the right speed all the time – automatically – no manual adjustments necessary!

*Pilot™ Sensor monitoring egg shell temperature and ambient temperature to send data to Delta Drive™.*
